200 XP TO RANGE RAT

You said you learn from videos. Good news: this whole course is videos. Harvard films it like a show – live demos, props, a professor who's genuinely funny. You objected your way into exactly the format you wanted.

One rule, and it's the only one that matters: a video gives 0 XP until code follows it. Watching feels like learning. It isn't. Watch → build → tick. That's the loop.

Tap a mission to open it. Tap the box to complete it. Your streak is the score – **2 hours a day keeps it alive. A zero day kills it.** Nobody checks this but you. That's the point.

HOLE 0 TEE UP

Tonight. 45 minutes total. Every button is a real link – tap it, do the thing, come back, tick it.

HOLES 1-6 FRONT NINE

Mon 20 – Sat 25 July · Weeks 0-4 of the course. Each mission = watch the lecture (it's a video, your thing), then beat the problem set.

Week 0 — Functions & Variables

watch → build → submit

+40

Week 1 — Conditionals

if this, then that

+40

Week 2 — Loops

make the machine repeat itself

+50

Week 3 — Exceptions

△ the week everyone feels stupid

+50

Week 4 — Libraries

stand on other people's code

+50

SHIP #1 — put something on the internet

Friday · ugly is allowed, invisible is not

+80

BOSS 1 — prove it out loud

no notes, no screen, one human

+150

HOLES 7-12 THE SWING REBUILD

Mon 27 Jul – Sat 1 Aug · Weeks 5-7. Every golfer who rebuilt a swing got worse first. This is that week. It was predicted. Keep swinging.

- ☒ **Week 5 — Unit Tests**
code that checks your code +60
- ☒ **Week 6 — File I/O**
your programs stop being toys +60
- ☒ **Week 7 — Regular Expressions**
△ genuinely horrible. everyone hates it. +70
- ☒  **SHIP #2 — something that reads a file**
Friday +80
- ☒  **BOSS 2 — break it on purpose**
the weirdest flex in programming +150

HOLES 13-18 CARD IN

Mon 3 - Sat 8 Aug · Weeks 8-9 + final project + the certificate.

- ☒ **Week 8 — Object-Oriented Programming**
the big one · take two days +80
- ☒ **Week 9 — Et Cetera**
the last lecture +50
- ☒ **Final Project**
your idea · your build +120
- ☒  **BOSS 3 — claim the Harvard certificate**
free · real · yours +200

FINAL ROUND PLAY FOR REAL

Mon 10 - Sun 16 Aug · The certificate was the warm-up. This week is the point.

- ☒ **Pick the idea — one sentence** +40
"It lets ___ do ___ without ___"
- ☒ **Build it small. Ship it.** +100
cut features until it's boring, then cut one more
- ☒ **Get ONE real user** +80
the hardest mission on this board
- ☒ **Submit to Stardance + demo in Hack Club** +60
collect your hardware
- ☒  **FINAL BOSS — it runs on someone else's machine** +250
the whole summer, one test

NEXT SZN

LOCKED UNTIL SEPTEMBER

Sept-Dec: **CS50X** → real computer science, free certificate. **2027:** **CS50W** → websites & apps, then **CS50 AI** → and **ANTHROPIC ACADEMY** → + **HF AGENTS** → - all free, all with certificates.

And the secret main quest running under all of it: **school maths**. Linear algebra, calculus, probability – that's the actual gate on serious AI. Every maths lesson is an hour of AI paid for in advance.
